

Airline Ticket System

Designed by: Arturo Bramasco

Simple UI

My intentions are to create a reliable and easy way to purchase an airline ticket. My organization will work with a variety of other airline partners to ensure the experience is greater. I also plan to provide tech advancements in order to protect the users information.

Key Features

Seats Choices

Be able to choose and only see the different seatings

Payment

Simple payment system that only takes 4 steps to complete once selected a seat type.

Flight Info

See your flight and payment info without the stress of figuring it out.
